Las Imagenes del Universo Marcelo Leonardo Levinas

Scientific Collection barking , 324pp , ON BOOK :: Visions of men have always depended on what they have to live , what they needed to believe and what they tried to know . Originally, their ideas about the cosmos were linked to the particular characteristics of the places they inhabited . When the first civilizations emerged and some of them managed to expand, their cosmologies , these general doctrines about the universe , covering more objects and entered into correspondence with a greater variety of phenomena. When , much later, around the human world ie : Earth were successful and livable , man systematized knowledge of physical reality and eventually spread to all parts of cosmos unattainable universality of laws. Why cosmologies element constituted meeting of the most important ideas and comprehensive on the nature of things and of human society itself ? Why that particular predilection for attending lejanísimos and unreachable objects like stars, to try to explain the causes of its movements , its rationale and its influence on human phenomena? The history of cosmology is a privileged way of understanding how men have imagined themselves and the world. By including some ideas and relegate other , and determining how they relate , each cosmology constituted , in fact, a hierarchical system of thoughts. Marcelo Leonardo Levinas makes a great review of the main ideas about the universe and science produced by the West from antiquity to the seventeenth century. Light reading , images of the universe is a fascinating tour of the main systems of the world , in whose construction the man put the best of their imagination and their knowledge ..
